POTENTIAL HEALTH EFFECTS

Eyes May cause moderate eye irritation. May cause corneal injury.
Skin Prolonged contact can cause irritation.
Ingestion Single-dose oral toxicity is expected to be low. Small amounts swallowed incidental to normal handling operations are not likely to cause injury; swallowing amounts larger than that may cause injury.

Inhalation	At room temperature, exposures to vapors are minimal due to physical properties; higher temperatures may generate vapor levels sufficient to cause irritation.
Chronic Effects/ Carcinogenicity	This material is not considered to be a carcinogen by the National Toxicology Program, the International Agency for Research of Cancer, or the Occupational Safety and Health Administration.
Medical Conditions Aggravated by Exposure	Material and its emissions may aggravate preexisting eye disease.
Primary Routes of Entry	Skin, eyes

Eyes	Immediately flush eyes thoroughly and continue to repeatedly flush eyes with constantly running water for 15 minutes, lifting the upper and lower eyelids occasionally. Consult a physician.
Skin	Immediately flush skin thoroughly and continue to repeatedly flush skin with constantly running water for 15 minutes. Remove contaminated clothing and shoes; wash before reuse. Seek medical attention if irritation persists.
Ingestion	If patient is conscious and can swallow, give two glasses of water. Seek medical attention. Induce vomiting only if directed by medical personnel.
Inhalation	Remove to fresh air. Give artificial respiration if not breathing. Administer oxygen if breathing is difficult. Consult physician.

5. FIRE FIGHTING MEASURES
